CALEB FELTON

DATA ANALYST | STATISTICIAN | TECHNICAL WRITER

PROFILE

Seeking a post-graduation full-time position where I can apply my knowledge, skills, and abilities in the areas of data analysis and visualization to benefit the organization.

EXPERIENCE

MATH INSTRUCTOR / TUTOR (January 2024 — Present)
Mathnasium

Teach/tutor students in a variety of math disciplines; Work collaboratively with colleagues to deliver individualized instruction in a group setting; Assess students' learning progress and engagement throughout instructional sessions.

DATA VISUALIZATION INTERN (April 2023 — December 2023)
Centers for Disease Control and Prevention (CDC)

Stored, organized, tracked, monitored, and shared data to create customizable reports with use interactions, which included creating Power BI dashboards, to inform insights on public health. Presented findings and reports to the Workforce Development Division leadership.

DATA ANALYSIS INTERN (June 2022 — August 2022)
Jamestown Settlement & American Revolution Museum at Yorktown

Performed data analysis, database cleaning, and database maintenance; Assisted with the preparation of customer research materials, reports, and presentations; Conducted exit surveys on attraction visitors; Presented analysis information; Gathered, interpreted, and documented requirements for analytical research; Developed and maintained databases and spreadsheets, including entering, updating, and cleaning data; Provided recommendations for process improvements.

NASA VAST/VESSS INTERN (May 2019 — August 2021)
NASA's Virginia Aerospace Science and Technology Scholars Program

Organized proposal progression and work allocation for students in collaboration with program staff; Advised students on how to communicate their findings with technical vernacular for a professional audience and with clarity for the general public; Facilitated meetings with students.

RESEARCH

QSSS SCHOLAR (August 2018 — May 2022)
Quantitative Social Science Scholars (QSSS) Program Carnegie Mellon University

Conducted research analyzing the intersection of cable news viewership and Covid-19 vaccination and death rates; Utilized data gathering, predictive modeling, statistical analysis, and graphing techniques; Presented an end-of-program report detailing project findings.
